Heartburn			Gynecological (women)		
Blood in stool			Irregular vaginal bleeding		
Musculoskeletal			Vaginal Discharge		
Neck Pain			Vaginal pain, itching or burning		
Back Pain			New/changing breast lump		
Joint Pain					

****Beyond your preventive care please list additional questions you want addressed if possible:**

Preventive Care Coverage versus Medical Care Coverage

Many insurance companies now cover preventive care services without copays or deductibles. These services typically include an annual preventive visit, routine vaccines and screenings for medical conditions such as cancer, high cholesterol and diabetes. Insurance companies follow national guidelines that do not consider some medication refills, monitoring chronic conditions or assessing and managing *new* symptoms as preventive care. For insurance purposes, these services are treated as two separate visits and must be billed as such.

For your convenience, we often complete both of these services at one office visit. However, if we discuss chronic medical conditions (refill medications, monitor labs, etc) or manage new symptoms (knee pain, cough, rash, etc) at a preventive visit you may be subject to whatever co-pay or deductible your insurance requires for a routine medical office visit.

In summary: You can schedule both types of services together, but please be aware that **your insurance will likely consider these two separate visits on the same day.**

Here are some typical examples (but confirm with your own insurance):

Preventive Visit

Annual wellness visit
Screening cholesterol
Mammography

Routine Medical Care

medication refills
lab work for chronic condition
x-rays to diagnose symptoms
